PROFILE SUMMARY

Cloud & SRE Engineer with 3+ years of experience building scalable, reliable, and automated infrastructure across AWS environments. Skilled in Kubernetes (EKS), Infrastructure-as-Code (Terraform, Ansible), CI/CD pipelines, and incident response. Proven ability to reduce system downtime, optimize resource usage, and build self-healing systems using observability and automation-first approaches.

PROFESSIONAL EXPERIENCE

Cloud DevOps Analyst

Accenture, India

Nov 2020 - Jun 2023

- Created **50+ Ansible playbooks** integrating with Jenkins CI/CD and delivered technical support for hybrid cloud systems
- Reduced AWS VM provisioning time by **90%** through Ansible scripts and streamlined post-deployment configurations
- Automated deploying of **Apache, Tomcat** web servers over **85 RedHat servers** with security configurations as per client needs
- Drove down **support ticket costs by 98%** (\$2,254→\$46) and server provisioning costs by **98%** (\$511→\$10.42) through cloud automation for a **financial service client**
- Designed resilient **infrastructure using IaC** and supported scalable deployments across **Dev/UAT/Prod** environments with AWS.
- Reduced incident response time by **60% through on-call participation**, real-time debugging, and implementing postmortem learnings.
- Diagnosed network **compliance drift across Cisco/Nexus switches** and deployed automated fixes with 10x faster drift detection
- Automated user onboarding for Citrix VDI systems to **map 700+ users** and **reduce efforts by 70% using PowerShell** and Ansible

PROJECT EXPERIENCE

AWS Landing Zone Framework (Terraform, Python, AWS Control Tower)

- Designed and deployed a secure **AWS multi-account landing zone** using the control tower and YAML blueprints to provision the environment in 15 minutes for **client-facing data workflows**
- Implemented centralized access with **IAM Identity center**, SCPs, and AWS config to **enhance least privilege, drift detection**, and audit readiness for **SOC 2 Type II compliance**

StudentCore API (Golang, SQLite, Pagination, REST API, Postman)

- Developed a **scalable student management API** with four core endpoints and efficient request handling with a **50 ms response time**
- Implemented prepared statements to **reduce query preparation overhead by 40%** in a custom SQLite storage layer

5G Cloud Project (Docker, Kubernetes)

- Configured **Kubernetes clusters** for deploying Virtual Network Functions(VNFs) in a simulated 5G Environment
- Containerized VNFs using **Docker** and deployed them using **YAML manifests** and **StatefulSets** for persistence

TECHNICAL SKILLS

Languages & Databases: Python, Golang, Shell, PowerShell

Cloud Computing: AWS (EC2, IAM, S3, CloudFormation), Azure (Azure DevOps), GCP (Cloud Build, Cloud Run)

Infrastructure Automation: Ansible, Terraform, Jenkins CI/CD, GitHub Actions,

Container Orchestration: Docker, Kubernetes, Helm

OS & Other Tools: RHEL, Ubuntu, Windows, Datadog, NGINX, Git, Vim, BitBucket, Cursor

Certifications: AWS Developer Associate, AWS Cloud Practitioner, Aviatrix-Multicloud Network Associate, RedHat199

EDUCATION

State University of New York, Binghamton, Master of Science, Computer Science

Aug 2023 - May 2025

Pune University, Bachelor of Engineering, Computer Science

Aug 2016 - May 2020

LEADERSHIP EXPERIENCE

Vice President of Education, Information Systems Club, Binghamton University

Aug 2024 - May 2025

- Organized and led multiple **workshops on Linux, Python, and MySQL** for **30+ students** to enhance practical skills

President, Toastmasters International Club

Jul 2022 - Mar 2023

- Facilitated speech preparation and monitored pathway programs for new members and **delivered 10+ mentor sessions**
